

# INSTRUCTIONS

Select Genesis 9 (basic) in the scene and click on the "Full Set" icon. This will load the Fun Tool Belt, with all the toys and props packed, parented on the pelvis of the G9. The props will be parented on their positions on the belt.

You can also load each item separately. If you want the belt to be parented on G9, select G9 before loading. If you load the props separately and you pose them on the belt, make sure to parent them to the "Bag L", "Bag R", or the "Back" bone, depending on where you want to position them.

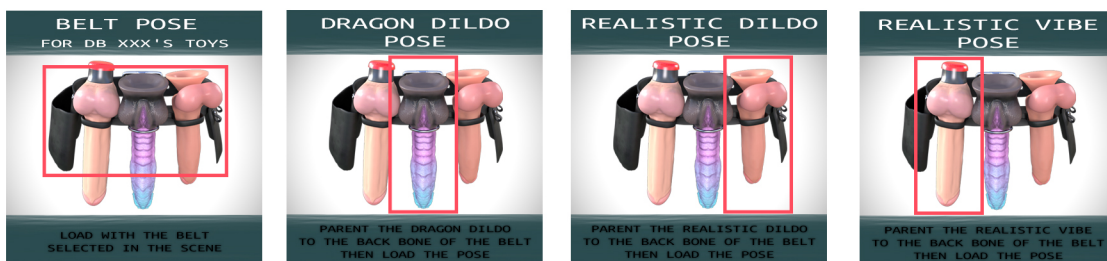

To use the Blindfold on the G9's head, select the G9 and load the Blindfold. It will be fitted automatically. To avoid pokes through, leave the eyes in the default pose and switch off the visibility of the eyelashes and eyebrows (click the small "eye" icon in the Scene tab in front of these items to make them invisible). To select it also use the Scene tab as it is not selectable in the viewport.

To use the Gag on G9's head, select G9 and load the Gag. The Gag will be parented on the G9's head. The Gag is not fitted, it is rigged, and you need to adjust its bones to fit the pose and the character you are using. For easier posing of the Gag on G9, you can use the Gag and G9 basic poses from the Bonus Poses folder. To use these poses, first select the G9 and load the Gag. Select G9 and load the "G9 Head Pose for Gag". Select the Gag and if you are using the G9 base female, apply the "Gag Pose for G9F", and if you are using the G9 base male, apply the "Gag Pose for G9M".

Use the sliders for easier bending and posing of the Dildo, Double Dildo, Anal Beads, Teaser, and Spanker (select the prop and go to Parameters/General to find the sliders).

The belt is not fitted, it is only parented to the pelvis. This will allow it to follow the figure, but if the figure is morphed, it might need some adjustments. To adjust the belt if needed, use the "Front", "Back", "Side R", and "Side L" bones. If the side bags get in the way of the thighs, you can adjust them with the "Bag R" and "Bag L" bones. The holders also have their bones that you can use to adjust them to fit different props/toys. To show you how you can pack some other toys that you might already have in your collection, you will get some bonus poses for the popular db xxx's toys: "Realistic dildo", "Realistic vibe", and "Dragon dildo". These poses are located in Bonus Poses\Poses for db xxx's Toys. There you will also find a pose for the Belt that adjusts the holders to fit these toys. To use these poses, first load the Belt with the G9 selected. Apply the "Belt Pose for db xxx's Toys" on the Belt. Load the "Realistic dildo"/"Realistic vibe"/"Dragon dildo" with nothing selected in the scene. Then, parent the "Realistic dildo"/"Realistic vibe"/"Dragon dildo" to the "Back" bone of the Belt. Select the toy and apply the corresponding pose.

To change the color of the Dildo, Double Dildo, Anal Beads, Anal Plug 1, and Anal Plug 2, go to the Surfaces tab, and change the "Base Color" property.
